5 Courses

**Fundamentals of Graphic Design**

**Introduction to Typography**

**Introduction to Imagemaking**

**Ideas from the History of Graphic Design**

**Brand New Brand**

Aug 8, 2024

**Hassan Abdullah Mohamed**

has successfully completed the online, non-credit Specialization

## Graphic Design

In this Specialization, learners were equipped with a set of transferable formal and conceptual tools for “making and communicating” in the field of graphic design. Learners were exposed to the fundamental skills required to make sophisticated graphic design: process, historical context, and communication through image making and typography. Learners completed a capstone project that applies the skills of each course in a finished branding project suitable for a professional portfolio.

Michael Worthington  
Faculty, Program in  
Graphic Design  
School of Art

# Statement of Achievement

Hassan Abdullah Mohamed

has successfully achieved student level credential for completing the Python Essentials 1 course, provided by Cisco Networking Academy in collaboration with OpenEDG Python Institute.

The graduate is able to proficiently:

- Design, develop, debug, execute, and refactor simple computer programs written in Python 3.
- Think algorithmically to analyze problems and implement them as computer processes.
- Use the syntax, semantics, and the most important elements of the Python Standard Library to write Python scripts and resolve typical implementation challenges.
- Understand the role of a programmer in the software development process.
- Attempt the qualification PCEP – Certified Entry-Level Python Programmer from OpenEDG Python Institute and continue their professional development at an intermediate level with Python Essentials 2.

Statement of Achievement

# JavaScript Essentials 1 (JSE)

---

The graduate of the *JavaScript Essentials 1 (JSE)* course, provided by **Cisco Networking Academy®** in collaboration with **OpenEDG JavaScript Institute**:

- knows the syntax of the core JavaScript language to a degree that allows them to work with variables, operators, control flow, and functions;
- knows the basics of the JavaScript data types system, distinguishing between primitive and complex types, and is able to choose a type adequate to their needs;
- thinks algorithmically and can analyze a problem using a programmatic conceptual apparatus;
- knows how a program is interpreted and executed in an actual computer environment, and can design, develop, and improve very simple JavaScript programs;
- can interpret and handle basic exceptions related to errors in program execution;
- understands a programmer's work in the software development process, and the role of fundamental development tools.
